

PALRING SUPER SILVER 100

- Optimizes the use of water and fertilizer
- Improves, as a result, yields and quality
- Prevents weeds, saving on the use of herbicides and reducing the pollution of the environment.
- Reduces salt build-up in the soil.
- Creates an environment of "distilled water" and raises the root system close to the surface – therefore more available oxygen.
- In the case of the use of recycled water it prevents the fruit from coming in contact with the water.
